Retrofit programme 2027–2029: our proposal and next steps

Dear Ms Clarke,

Thank you for the time you and your estates team gave us on 6 October, and for the walk round the Lawrence Hill blocks. It is rare to see a programme briefed so clearly, and we are grateful for it.

As agreed, we enclose our proposal for the first phase of the retrofit programme. In short, we recommend that the Trust surveys all 412 homes in the first two phases before committing to a measure package; sequences the works by block rather than by measure, so that each household lives with one eight-week window of disruption; and funds independent monitoring for three years from the outset, so that the performance gap is measured rather than estimated.

The fee for the survey and design stage is fixed at £148,500 excluding VAT, payable in three stages. Our full terms, and the evidence behind each recommendation, are set out in the enclosed report.

We would be glad to present the proposal to your board on 3 November, as you suggested. In the meantime, please do not hesitate to call either of us directly.

Yours sincerely,

Eleanor Vos
Managing Partner

Tomas Halden
Partner, Building Physics

Enclosure: Retrofit programme 2027–2029, proposal for phase one (24 pages).
